Revenue at Risk by Leakage Type

Recommendation 1: Sellers with review scores below 2 are driving late deliveries and cancellations. A minimum seller rating threshold of 3.5 should be enforced to improve reliability.

Recommendation 2: Products in categories where average freight ratio exceeds 40% of selling price should be repriced or re-evaluated to protect margins.

Recommendation 3: Customer states such as PI, CE, AL, and MA show disproportionately high late delivery percentages. Targeted logistics improvements or regional carrier reviews are required.
